

Product information

Product name:	anti-Tylosin pab ELISA-Stick with reagents
Product number:	ET-2
Package size:	5 tests
General Description:	Tylosin is a macrolide-class antibiotic used in veterinary medicine. It has a broad spectrum of activity against gram positive organisms and a limited range of gram negative organisms. It is found naturally as a fermentation product of <i>Streptomyces fradiae</i> . Tylosin is used in veterinary medicine to treat bacterial infections in a wide range of species and has a high margin of safety. It has also been used as a growth promotant in some species, and as a treatment for colitis in companion animals.
Principle:	The <i>Tylosin detection reagent set</i> is sensitive and easy to handle test for the detection of Tylosin. The test can be carried out without sample preparation or pre-incubation. Since the test does not require any labour equipment, it is especially suitable for analysis on the spot.
Sensitivity:	Detection limit 1 ng
Sample size:	max. 1 ml
Assay sample type:	any sample
Detection time:	1.5 h
