

Product information

Antibody name: anti-Hepatitis B surface (HBsAg)

Product number: H05H-1

Product description: HBsAg antigen IgG2b/kappa; monoclonal

Origin: mouse

Immunogen: recombinant HBsAg

Epitope: surface antigen

Purity: cell culture bioreactor harvest (1 mg/ml IgG in DMEM)

Clone: S14

Applications: ELISA (1 : 1.000), immunofluorescence (1 : 200), immunoperoxidase staining of infected liver tissues and HBV-transfected hepatoma cells

Immunocrossreaction: human

Storage: short term +4 °C; long term -20 °C.
Repeated freezing and thawing is not recommended.

Quantity: 100 µl

For research purposes only
