

## **Product information**

Antibody name: anti-D2 protein (PsbD)

**Product number:** P12S-1

**Product description:** polyclonal antibody;

contains 0.01% NaN<sub>3</sub>

*Origin:* rabbit

Immunogen: synthetic peptide (a.a. 230 - 240)

specific for PsbD protein from Arabidopsis

**Applications:** Western blot (1 : 2.000)

Immunocrossreaction: higher plants (Arabidopsis,

spinach, rice and others).

Storage: short term +4°C; long term -20°. Repeated

freezing and thawing is not recommended.

Quantity: 100 μl

So At

47 –

24 –

Western blot of spinach (So) and *Arabidopsis* (At) thylakoids with anti-D2

**Protein description:** D1 and D2 are the major constituents of photosystem II reaction centre and bear two tyrosine donors which are placed at a luminal loop of D1 and D2. D2 polypeptide has five transmembrane helices. In both, plants and cyanobacteria, the hydrophobic polypeptides, D1 and D2, bind most of the prosthetic groups that are involved in electron transport.
