Description:	Tylosin is a macrolide-class antibiotic used in veterinary medicine. It has a broad spectrum of activity against gram positive organisms and a limited range of gram negative organisms. It is found naturally as a fermentation product of <i>Streptomyces fradiae</i> . Tylosin is used in veterinary medicine to treat bacterial infections in a wide range of species and has a high margin of safety. It has also been used as a growth promotant in some species, and as a treatment for colitis in companion animals.
